- | Extensive layout options thanks to mobile carriage which can be manoeuvred through all angles from 90° - 180°
- | No parking station for panels required

Profile system

- | Element thickness 31 mm
- | All glass slide and turn system
- | In-line support, no vertical frames
- | Permanently vented system, secure from driving rain

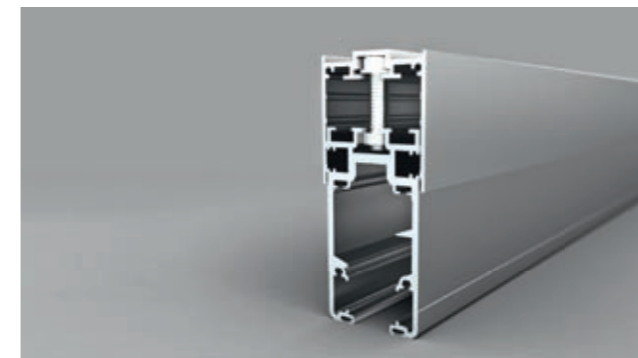

Engineered

Horizontal twin ball bearing runner devices with 65 kg bearing load guarantee that window sashes can be slid open extremely smoothly.

Glass thickness

Glazing with single pane safety glass with a thickness from 8 to 15 mm. Highest security for high-rise buildings.

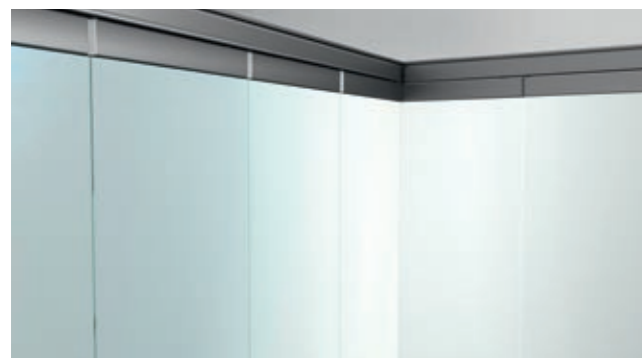

Height adjustment

Height compensation section to absorb tolerances of up to 35 mm (even after installation).

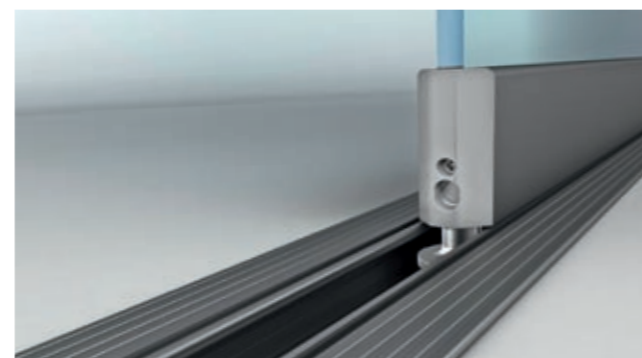

Ventilation

Lockable two-step trickle ventilation for controlled ventilation (optional)

Transparency

No vertical panel profiles, thus unobstructed view.

Floor track

Flush floor track without upstand available for disabled access.

Knob grip

Turning sash equipped with knob grip for easy internal and external operations (optional)

Door handle

Lockable all glass door handle in stainless steel appearance (optional)
